

Nominal carton envelope

Labelled relationship only - not production cut or crease geometry

Schematic page scale only; labels carry the supplied nominal values.

NOT PRINT READY

SUPPLIED / PROVISIONAL

120 x 70 x 210 mm

Interpreted as W x D x H; internal/external basis not supplied.

REVERSE-TUCK

Opposing end closures only; exact subtype, owner and orientation not supplied.

350 GSM BOARD

Basis weight only; grade, caliper, coating and grain direction not supplied.

THIS DELTA ESTABLISHES

- Nominal envelope and proportional body-panel relationship.
- Reverse-tuck closure relationship at a category level.
- Board basis weight for sample sourcing.

OPEN Cut/flap/joint geometry, score compensation, caliper and tolerances

Nominal body-band map

Four-panel relationship derived from the supplied envelope - arbitrary page scale

NOT A DIELINE

UNRESOLVED

- No cut contour
- No flap profiles or depths
- No glue joint position or width
- No score allowance or caliper compensation
- No crease direction / tooling spec
- No radii, slots, notches or locks
- No tolerances
- No bleed or safe areas
- No panel print orientation

Nominal panel sum: 380 mm. This excludes the joint and every converting allowance, so it is not a blank width.
